## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kadota et al (US 5,459,328).

Figure 6 illustrates a plurality of current drive devices (LD1-LDn), a plurality of bypass circuits (I1-In) connected in parallel with current drive devices, where the bypass circuits control the flowing currents (I1-In).

### ***Allowable Subject Matter***

Claims 2-21 are allowed.

The following is an examiner's statement of reasons for allowance:

After conducting a search none of the searched prior arts alone or in combination discloses the claimed current drive device control circuit having the structural combination of independent claim 2, in particular having a plurality of current detection means for detecting the bypass current of each bypass circuit, comparing and generating a control signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
